

referee. I set a good example to the boys by creating a double-handed snatch record of 148 lbs., but it was not their night out, and no other records were put up.

Devis failed at 200 lbs. R.H. bent press, Flint failed at 167 lbs. L.H.C., Paine failed at 122 lbs. R.H.S., and Clarke failed at 125 lbs. R.H.S. All these lifts will be accomplished in the near future.

In the meantime I can only advise all to wait and see. To chronicle the result of a year's hard work, has taken up a considerable amount of space, and if any significance can be attached to the fact that it is the intention of the members to go still further in the future than they have done in the past, I should imagine that the next time the records of the C.W.L.C. appear in print it will be in the form of a book. In conclusion I can only say that my sincerest wish is that other Clubs, and lifters who have not the opportunity to join one, enjoy half the success that has attended the C.W.L.C. during the time it has been under my care. If such be the case, a greater interest will be aroused, and more matches will undoubtedly eventuate.

In all cases may the best man win, as "to the strong shall belong the spoils."
